

Lam Tien Nga - Kasetsart University – Thailand

My name is Tien Nga, a student of Advanced Biotechnology, Course 33. I am pursuing Master degree in Biotechnology at Kasetsart University, Thailand. In 2013, Nga applied for annual scholarships which was offered by Agro – Industrial faculty and Kasetsart University. My researches focus on biomaterial. To put it

more specific, natural materials were used to extract cellulose to apply in packaged films or scaffold. In my research, I am going to synthesis biomaterials, scaffold for tissue engineering from poly(vinyl alcohol) and nanocellulose. The equipment and materials which are established to research are modern and advanced.
