

## Nguyen Nhat Nam – Gachon University – Republic of Korean

Nguyen Nhat Nam has graduated the Bachelor of Science Degree in Advanced Biotechnology Course 34. After graduation, he was awarded Master scholarship of Biomedical Engineering at Gachon University, Republic of Korean.

During the time study in Biotechnology Research and Development Institute, Nam had opportunities to work in different laboratories such as Molecular Laboratory, Biochemical Laboratory, and Stem cell Laboratory. These accumulate experience and laboratory skills are extremely meaningful for him for studying Korea

**Gachon University (Global campus)**

Nam is now studying on Nanocatalyst and Analysis Laboratory. The main research is fabrication of nanomaterial and micromaterial which provide range applications in drug delivery, bioimaging and biosensors. Other topic of Nam is using high pressure system to fabricate multifunctional micro-HPLC column applied for separation and analysis of small molecules.
