

## Nguyen Minh Thuy – Yamaguchi - Japan

### JASSO SCHOLARSHIP'S REVIEW

Japan Student Services Organization (JASSO) is an independent administrative institution established under the Ministry of Education, Culture, Sports, Science and Technology (Monbukagakusho). JASSO comprehensively administers scholarship loan programs, support programs for international students, and student support programs. The purpose of these programs is to foster the development of creative

individuals who, rich in humanism, will become the leaders of society in the next generation, while at the same time to promote international understanding and exchange. his scholarship is available for qualified international students accepted by Japanese universities, graduate schools, or colleges of technology under the student exchange agreement on a short-term basis from about three months to one year. With the helping from Cantho university, Biotechnology Research and Developing Institute and the approval of Yamaguchi university, Japan, I and Nguyen huu Tuong are senior student of Biotechnology course 34 had three months (from 1/10 to 28/12/2013) to study and exchange culture in Yamaguchi university belong to Yamaguchi city, Japan.

JASSO program attracted many students who follows Bachelor, Master, PhD. who comes from many countries such as Vietnam, Thailand, Indonesia,... In this three months, I attended to thermosensitive bacteria laboratory in which professor guided me to study about check the transporter of three acid acetic bacteria (denoted by 3283; 3284; 3279), isolated from Thai's fruit, and conjugation's protocol. Each Monday's morning, they have a Group Meeting about five students who have to present their experiment processing in two weeks, after that open discussion between student and professors. Through out Group Meeting, student can

regconize their errors and design another experiment. Beside learning in laboratory, I had a chance to join "Young scientist seminar 18<sup>th</sup>" which was happened in 18-19/November. YSS are hold annual year by students and the supporting from professors. In two days of YSS, I can attend to invited speaker's presentations, who are lecturer come from Japan, Vietnam, Thailand, Indonesia universities, and presented my research in small group. In additon, I also learned about Japanese culture like Japanese tea party, traditional instruments and visit many famous place in here, such as Rurouni temple, Miyajima, ... Japan is a country have to sustain many disasters such as tsunami, earthquake moreover

they are effected by nuclear radiation. However, their recovery is really a miracle so that I admire their talent and diligence of Japanese.

JASSO scholarship has given me the opportunity to spend my life in a new place, I have learn to live independently, promoted my english speaking skill and the most important thing is established friendship with Japanese and international students.

The experiments that i received in Japan, will being usefull for me in the future to find a job. I would like to say thank you to JASSO scholarship, Cantho university, Biotechnology Research and development institute and Yamaguchi university for all things. I already have a memorable time in Japan and many precious experiments.
