

Tran Nguyen Nhat Khoa - National Pingtung University of Science and Technology - Taiwan

Tran Nguyen Nhat Khoa is a student of Advanced Biotechnology Course 34 (2008 – 2013). Khoa is pursuing the Master program (2014 – 2016) in National Pingtung University of Science and Technology (Taiwan) sponsored by the TaiwanICDF Scholarship (The International Cooperation and Development Fund).

Since 1998, The TaiwanICDF has provided scholarships for higher education and has developed academic programs in cooperation with renowned partner universities in Taiwan. During studying, the scholarship recipients are also promoted interaction and exchange between students from partner universities through annual sport competition, short camps and trips.

Orientation for TaiwanICDF recipients (2014)

Khoa is a master student in Food Science at National Pingtung University of Science and Technology. His research mainly focuses on the enrichment of isoflavone compounds in foods and their effects on the body systems, which partly contributes to diversify functional food products with highly isoflavones and nutritional contents.
