

Vo Ngoc Thao Nguyen - University of Arkansas – United State of America

Vo Ngoc Thao Nguyen was a student of advanced Biotechnology program, course 34 (2008 – 2013). She is one of the outstanding members of the class. Her dream is to study abroad to widen her knowledge and return to contribute to the science of Vietnam. After she graduated in September, 2013, Thao Nguyen is determined to pursue VEF fellowship to go to the US. With the effort and hard studying, she passed 2 rounds of VEF and was awarded a PhD scholarship at University of Arkansas, Arkansas, USA. Nguyen is one of a few outstanding youth can achieve full PhD. Scholarship which is provided by VEF, she has started her study since August 2013 in US.

The study environment in US, a good condition with modern facilities, is a dream of many young students. She was amazed by the beauty and interesting experience in this country. Thao Nguyen said: “Being in PhD. Study is the biggest dream in my life, to fulfill this dream I have to prepare very early in high school and through the time in undergrad. I really appreciate the help of my family, my teacher and my friend who always support me in learning process”. The academic achievement of Nguyen is a typical example for young students to make a great step in their future.
